DETAILED ACTION

1. Claims 1-4 have been examined.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Becker et al. "Automatic Parallelism Exploitation for FPL-based Accelerators" (hereinafter Becker).

4. As per claim 1, Becker teaches the invention as claimed, including a method for partitioning large computer programs and or algorithms at least part of which is to be executed by an array of reconfigurable units such as Arithmetic Logic Units (ALUS) (see page 170, Figure 2, right column, paragraphs 2, 3, page 171, Figure 4), comprising the steps of
defining a maximum allowable size to be mapped onto the array (see page 176, left column, paragraph 2; EN: the vectorization factor is the maximum allowable size),
partitioning the program such that its separate parts minimize the overall execution time and providing a mapping onto the array not exceeding the maximum allowable size (see page 172, right column, paragraph 1, pages 173, left column, paragraph 3, page 174, right column, last paragraph, page 176, left column, paragraphs 2-4; EN: the program is partitioned into a sequence of maximal parallelized execution units according to the granularity of the architecture and the

hardware constraints and using a scheduling algorithm to minimize total execution time under resource constraints).

5. As per claims 2 and 3, the limitations recited in these claims are substantially similar to those recited in claim 1. Therefore, they are rejected using the same reasons as claim 1.

6. As per claim 4, Becker teaches the reconfigurable processing units are arithmetic logic units (see page 170, Figure 2, right column, paragraph 2).

Response to Remarks

7. Rejection of claims under §102(a):

8. In the After Final Amendment dated 7/23/2009, Applicants pointed out that Cardoso does not constitute prior art because the instant application claims priority to European Patent Application No. 02001331.4 which was filed on January 18, 2002. In response, the Office Action dated 1/23/2009 is withdrawn.
